

INSTALLATION INSTRUCTIONS

2017 FORD F-250/350 SUPER DUTY 6.2L | PART NO. 19351

BILL OF MATERIALS:

- 1. INLET PIPE ASSEMBLY
- 2. 19.25" EXTENSION PIPE
- 3. EXTENSION PIPE ASSY.
- 4. MUFFLER ASSEMBLY
- 5. TAIL PIPE ASSEMBLY

WEAR SAFETY GLASSES

READ INSTRUCTIONS THOROUGHLY BEFORE INSTALLING PRODUCT

SPRAY LUBRICANT

To ease removal of existing exhaust components (especially on older vehicles) spray penetrating lubricant on all fasteners and hangers/insulators that will be loosened or removed and let soak before disassembly.

HARDWARE KIT:

- 1. [4] 3.50" Clamp

MINIMUM REQUIRED TOOLS:

10, 13, 15 mm

Hanger Tool (Or Pry Bar)

MAGNAFLOW RECOMMENDS PROFESSIONAL INSTALLATION ON ALL THEIR PRODUCTS

WARNING: When working on, under, or around any vehicle exercise caution. Please allow the vehicle's exhaust system to cool before removal, as exhaust system temperatures may cause severe burns. If working without a lift always consult vehicle manual for correct lifting specifications. Always wear safety glasses and ensure a safe work area. Serious injury or death could occur if safety measures are not followed.

ATTENTION: Always install any supplied band or U-bolt clamps to the proper torque specifications of 40-45 ft-lb for band clamps and 30-35 ft-lb for U-bolt clamps. Over tightening will result in the clamps breaking and will NOT be warranted by MagnaFlow.

INSTALLATION INSTRUCTIONS

Step 1: To remove the OEM system loosen the clamp at the inlet pipe junction to the catalytic converters. Next, unbolt the flange coupling at the other inlet pipe.

Step 2: Next loosen the clamp rearward of the OEM resonator. Detach all welded hangers from the rubber insulators. The system may now be removed. Be sure to retain all mounting hardware as it will be needed to install your new MAGNAFLOW system

Step 4: Begin installing your new system by loosely attaching the Inlet Pipe Assembly to the catalytic converter outlet pipes using the OEM hardware. Engage the welded hanger to the rubber insulator.

Step 5: If required add the 19.25" Extension Pipe. Loosely attach the Extension Pipe Assembly using the supplied clamp[s]. Engage the welded hanger to the rubber insulator.

Super LWB	Crew SWB	Crew LWB
Cut 4.5" from 19.25" Pipe	Not used	Use 19.25" Pipe

Step 3: The chart pertains to the 19.25" extension pipe. Determine your vehicles configuration.

INSTALLATION INSTRUCTIONS

Step 6: Finish by loosely installing the Tail Pipe Assembly using the supplied clamp. Install the welded hanger to the rubber insulator.

Step 7: Once a final position has been chosen for the new exhaust system, evenly tighten all clamps from front to rear using the torque specifications on page one of these instructions. Inspect all fasteners after 25-50 miles for operation and re-tighten if necessary.
